EDUCATION

New York University

New York, NY

B.S. in Computer Science, GPA: 3.7/4.0

2022 – 2027

- Expected to receive B.S. and M.S. in Computer Science through an accelerated program
- Relevant Coursework:** Web Development, Mobile Development, Machine Learning, Distributed Systems, Data Structures and Algorithms, Operating Systems, Big Data, Intro to Blockchain, Databases, Data Analysis

EXPERIENCE

Full Stack Engineer Intern

May 2025 – Aug 2025

Civic

Remote

- Implemented an email template SDK module within a proprietary Rich Text Editor using TypeScript, PlateJS, and TailwindCSS, streamlining automation workflows and boosting user efficiency by 80%
- Engineered a collaborative comment tRPC system, enabling real-time updates for 15+ concurrent users and coordinating closely with design teams to ensure scalability and Agile development practices
- Built an AI integration pipeline using CopilotKit, AWS S3, and OpenSearch, improving solution accuracy by 30% and expanding adoption across 10+ client environments

Backend Developer Intern

Feb 2025 – May 2025

LikeLion US

Remote

- Integrated authentication and scheduling features with JWT, Google OAuth, and MySQL, decreasing manual scheduling time by 70% and increasing student session participation by 40%
- Automated CI/CD pipelines via CircleCI and containerized deployment, cutting release time in half and increasing deployment reliability by 25%
- Built and maintained a multi-layered, test-driven development framework using Pytest and uv, achieving 100% coverage across 15+ API endpoints and ensuring reliable backend performance as user traffic grew by 40%

Software Engineer Intern

May 2024 – Aug 2024

Cipher Mining

New York, NY

- Contributed to infrastructure and analytics systems at a leading blockchain mining company, optimizing large-scale Bitcoin network operations and increasing data throughput by 20% through a load-balancing performance improvement algorithm
- Ran multiple backtests across 10+ crypto to energy scenarios with NumPy, pandas, and visualization tools to evaluate machine controlling load balancer algorithms, reducing wasted energy by \$1M annually
- Presented forecasting and optimization results of energy saving across 3+ data centers to cross-functional teams, driving company-wide adoption and \$5M in annual cost savings

IBM Z Ambassador

Jan 2024 – Aug 2024

IBM

New York, NY

- Co-hosted an IBM industry panel at NYU, bringing in 8 professionals from IBM and partner companies, engaging 150+ students in mainframe technology
- Led a cohort of NYU IBM Z Ambassadors, coordinating events and initiatives that expanded campus awareness of mainframe computing by 25%

PROJECTS

Clink!: Scheduling & Challenges | *Swift, Supabase, PostgreSQL, GitHub Actions, Git*

Aug 2025 – Present

- An iOS app to be released by the end of December 2025 with 100+ waitlists
- Developed core product components, including CI/CD automation, database architecture, and frontend features

Image to Insurance Claim | *FastAPI, AWS, React, MaterialUI, OpenAI, MySQL, Git*

Feb 2025 – Feb 2025

- Incorporated the OpenAI API to analyze user-posted images and identify furniture with estimated pricing, achieving an average accuracy of 85% through finetuning and prompt engineering
- Implemented public AWS S3 to store and call images to allow asynchronous communication between FastAPI and AWS, allowing a scalable system that can serve hundreds of thousands of end users

TECHNICAL SKILLS

Languages: Java, Python, Go, C++, TypeScript, JavaScript, HTML/CSS (SCSS, TailwindCSS), Swift

Databases: MySQL, PostgreSQL, MongoDB

Developer Tools: Git, Google Cloud Platform, AWS, Docker, Kafka

Libraries/frameworks: FastAPI, Django, React, Next.js, Node.js, Apache Hadoop, MapReduce

Data Tools: pandas, NumPy, Matplotlib, Plotly, sklearn, Spark
